# We've got you covered.

Whether you're a member of law enforcement, a tactical response unit, or the armed forces, organization and readiness are key components to functioning at your best.

TAB's versatile weapons storage systems are designed to keep weapons, equipment and ammunition secure, protected and ready to mobilize.

This series of enclosed cabinets and open racks are fully customizable with interchangeable components or different weapons and gear.

TAB weapon storage products are engineered to maximize efficiency and the use of space, all while staying organized and ready.

# Load it up, lock it down.

Maximum security and a maximum level of readiness go hand in hand. Weapons, ammunition, computers, protective gear - you need them ready to mobilize, but remain secure when not in use.

TAB's uniquely versatile cabinet and rack solutions provide all of that. With heavy duty welded steel construction and a wide selection of components, you can easily accommodate virtually any type of equipment and store it worry-free.

## 1. Heavy Duty Construction

Welded solid steel construction that includes enhanced security features including reinforced doors with full length piano hinges and complete extension lock bars.

## 2. Adjustable Components

An extensive selection of fully adjustable brackets, shelves, bases and mounts to store rifles, shotguns, pistols, ammunition, optics, body armor, gear and other accessories.

## 3. Various Locking Options

TAB's Weapons Cabinets feature 5- or 7-point locking mechanisms that are secured with a key lock or padlock hasps. All variations comply with US Military standards.

## 4. Multiple Sizes

TAB offers 24" and 42" widths and heights ranging from 24" to 84" to meet your specific weapons storage needs.

# Cabinets

## Bi-Fold Door Cabinets

The design of this universal weapons cabinet incorporates bi-fold doors that fully recede into the cabinet. This feature allows for the cabinets to be utilized on high density systems or in areas where floor space is at a premium, while still meeting US Military security standards.

## Hinged Door Cabinets

Traditional style cabinets that allow for maximum storage utilizing the entire width of the cabinet. The clearance permits full access to stored weapons, gear, and accessories. The ventilated pattern provides airflow and allows visual inventory of stored items.

# Open Rack Systems

Designed for use in secured rooms or facilities, the open rack systems offer the same features of our cabinet selection with the added benefit of being readily accessible, having flexible heights and widths, and offering affordable layouts.

# Equipped for your equipment

Got long guns, pistols and ammo boxes to secure? How about helmets, riot gear, body armor, or night vision goggles? We have components to safely house all of those things. We even have your parachute storage in the bag.

The components for our weapons cabinets and racks include numerous bases, rifle and pistol brackets, shelves, hooks and bins to accommodate various firearms, ammunition, tactical gear and accessories. We'll make sure that all of your gear is stored neatly and safely and that it's easily accessible.

3 capacity horizontal rifle mount
